

Polyols for Flexible Foam, Rigid Foam and CASE Applications

Engineered for Performance and Sustainability

Gain a Competitive Advantage: Achieve Performance and Sustainability Objectives with EMEROX® Polyols

EMEROX Polyols are engineered to provide the polyurethane industry with economical solutions that easily integrate to improve your formulation. Key performance benefits include:

- hydrophobic backbone for superior moisture resistance,
- enhanced low temperature performance, and
- improved solvent and blowing agent solubility.

The high bio-based content will also help you meet your sustainability objectives. We offer a comprehensive portfolio of polyol grades to address a broad range of flexible foam, rigid foam and CASE application requirements. Contact us to learn more about what EMEROX Polyols can do for you and to request a sample. Experience the difference firsthand.

in Sustainable Polyurethanes**

About Emery Oleochemicals

Founded in 1840, Emery Oleochemicals has a rich heritage developing and manufacturing natural-based chemicals made predominantly from renewable oils and fats. Emery Oleochemicals' philosophy of 'Creating Value' for our customers is evident through our wide-ranging product portfolio that caters to the diverse and unique needs of an evolving marketplace.

Today, over 175 years later, Emery Oleochemicals is known for world-leading, in-depth technical expertise and the production of high-quality specialty chemicals. Through our global operations that span North America, Europe and Asia Pacific, we provide our customers with best-in-class sustainable products and solutions.

Located in Cincinnati, Ohio, USA, our site spans over 35 acres and has been operational since 1885. This site is home to our purpose-built polyols plant which supports high-volume production and is back integrated, ensuring security of supply to our customers. Our Polyols Technical Development Center is also located at our Cincinnati site, helping speed new product development time to market in order to meet the ever-evolving needs of the polyurethane industry.
